PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student and Full-Stack Developer specializing in the MERN stack. Proven track record of engineering scalable, high-performance web applications and robust real-time data architectures. Strong foundation in Data Structures and Algorithms (DSA) and modern software lifecycles, with a demonstrated ability to translate complex business requirements into optimized, user-centric technical solutions that drive engagement and operational efficiency.

TECHNICAL SKILLS

Languages: JavaScript, C, C++, Python, HTML5, CSS3

Frameworks & Technologies: React.js, Node.js, Express.js, MERN Stack

Databases & Tools: MongoDB, Git, GitHub, Pandas, NumPy

Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), REST APIs

EXPERIENCE

Squarecell Resource India Pvt. Ltd.

January 2026 – February 2026

Web Developer Intern (Virtual Internship)

- Spearheaded the architecture and development of a highly scalable, fully responsive coding platform, significantly enhancing accessibility for a global developer community.
- Engineered a robust client-server architecture utilizing React.js, Node.js, and Express.js, driving seamless and dynamic user experiences.
- Designed and integrated optimized MongoDB database pipelines, implementing advanced state synchronization to drastically reduce data retrieval latency.
- Mastered version control and collaborative agile workflows via Git and GitHub within the Qskill virtual internship framework.

PROJECTS

StudyTop | React.js, Web Architecture (Live Link: <https://study-top.vercel.app/>)

- Developed a comprehensive, interactive e-learning platform specifically designed to optimize student engagement and study efficiency.
- Implemented scalable front-end architectures with responsive design principles, ensuring a seamless cross-device learning experience.
- Engineered dynamic content delivery and progress-tracking modules to significantly enhance user retention and academic outcomes.

DocAna AI | React.js, AI Integration (Live Link: bhavesh189.github.io/DocAna/)

- Engineered an interactive AI-driven healthcare companion within the React ecosystem.
- Integrated the Google Gemini API to dynamically parse clinical documents, extracting real-time, actionable medical insights for optimal user assistance.

EnterNet: Netflix Clone | React.js, Streaming Architecture (Live Link: bhavesh189.github.io/EnterNet/home.html)

- Architected a premium entertainment streaming platform with highly optimized media content delivery mechanisms.
- Developed a robust modular React ecosystem, enabling dynamic data fetching and highly responsive state management.

Notes Web + App | Cross-Platform Development (Live Link: bhavesh189.github.io/CollageNotes)

- Built a high-performance productivity workspace enabling seamless cross-platform accessibility and secure data management.
- Prioritized rapid state synchronization and minimalist UI/UX design to maximize user retention and daily workflow efficiency.

Leetcode Metrix App | Data Visualization (Live Link: bhavesh189.github.io/LeetCodeProfile/)

- Created an advanced competitive programming analytical tracker with dynamic, real-time data visualizations.
- Mapped problem-solving distributions and key performance metrics to empower and track continuous developer progression.

EDUCATION & QUALIFICATION

Laxmi Devi Institute of Technology and Engineering

2025 – 2029

B.Tech in Computer Science Engineering

Star Public Sr. Sec. School

2024 – 2025

Physics, Chemistry, Mathematics (PCM)

LANGUAGES

English (Fluent), Hindi (Fluent)
