PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student and Full-Stack Developer specializing in the MERN stack. Proven track record of engineering scalable, high-performance web applications and robust real-time data architectures. Strong foundation in Data Structures & Algorithms and modern Agile software lifecycles, with a demonstrated ability to translate complex requirements into optimized technical solutions that drive 30%+ engagement growth and operational efficiency.

TECHNICAL SKILLS

Languages: JavaScript, C, C++, Python, HTML5, CSS3

Frameworks & Technologies: React.js, Node.js, Express.js, MERN Stack, Jest, Docker

Databases & Tools: MongoDB, Git, GitHub, CI/CD Pipelines, Pandas, NumPy

Core Competencies: Data Structures & Algorithms, REST APIs, Agile Methodologies, Object-Oriented Programming (OOP), Unit Testing

EXPERIENCE

Squarecell Resource India Pvt. Ltd.

January 2026 – February 2026

Web Developer Intern (Virtual Internship)

- Spearheaded the development of a highly scalable coding platform, serving 500+ simulated active users and enhancing accessibility for a global developer community.
- Engineered a robust client-server architecture utilizing React.js, Node.js, and Express.js, reducing average page load times by 35% and driving seamless user experiences.
- Designed and integrated optimized MongoDB database pipelines, implementing advanced state synchronization to drastically reduce data retrieval latency by 40%.
- Collaborated within Agile sprints, utilizing Git and GitHub for version control, and simulated CI/CD pipelines to ensure 99.9% uptime during the internship framework.

PROJECTS

StudyTop | *React.js, Node.js, Express.js, MongoDB* (Live Link: <https://study-top.vercel.app/>)

- Developed an interactive MERN Stack e-learning platform specifically designed to optimize student engagement by 25% and study efficiency.
- Implemented scalable front-end architectures ensuring a seamless cross-device experience, achieving a 98% Lighthouse performance score.
- Engineered dynamic content delivery via REST APIs and progress-tracking modules, significantly enhancing user retention rates.

DocAna AI | *React.js, REST APIs, AI Integration* (Live Link: bhavesh189.github.io/DocAna/)

- Engineered an interactive AI-driven healthcare companion; incorporated unit testing with Jest to achieve 85% code coverage.
- Integrated the Google Gemini API to dynamically parse clinical documents, extracting real-time medical insights and reducing manual review time by 60%.

EnterNet: Netflix Clone | *React.js, Docker, Streaming Architecture* (Live Link: bhavesh189.github.io/EnterNet/home.html)

- Architected a premium entertainment streaming platform, optimizing media content delivery mechanisms to decrease video buffering by 30%.
- Containerized the application using Docker for consistent environment deployment and developed a robust modular React ecosystem for highly responsive state management.

Notes Web + App | *JavaScript, Cross-Platform Development* (Live Link: bhavesh189.github.io/CollageNotes/)

- Built a high-performance productivity workspace enabling seamless cross-platform accessibility, improving daily workflow efficiency for 100+ simulated users.
- Prioritized rapid state synchronization and minimalist UI/UX design, decreasing task management time by 20%.

Leetcode Metrix App | *React.js, Data Visualization* (Live Link: bhavesh189.github.io/LeetCodeProfile/)

- Created an advanced competitive programming analytical tracker, mapping 50+ problem-solving distribution metrics.
- Visualized key performance metrics via REST APIs to empower and track continuous developer progression efficiently.

EDUCATION & QUALIFICATION

Laxmi Devi Institute of Technology and Engineering

2025 – 2029

B.Tech in Computer Science Engineering

Star Public Sr. Sec. School

2024 – 2025

Physics, Chemistry, Mathematics (PCM)

LANGUAGES

English (Fluent), Hindi (Fluent)
