SUMMARY

Computer Science undergraduate (CGPA 9.20, Bikaner Technical University, graduating 2029) and MERN stack developer. I architect production systems at my own venture Obfinity — including Dark Matter, an autonomous vulnerability-discovery platform with 11 verified findings across 8 vulnerability classes — plus React + Node.js/Express production experience, Go backend services, PostgreSQL/MongoDB, Docker and AWS. 350+ LeetCode problems solved; security-first engineering mindset.

EDUCATION

B.Tech, Computer Science — Bikaner Technical University *Aug 2025 – Jun 2029*
CGPA: 9.20/10 | **Coursework:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks

EXPERIENCE

Backend Engineer (Go) — **Obfinity** (own venture) *Jul 2026 – Present*
Remote

- Architecting Dark Matter, an autonomous vulnerability-discovery platform: Go + Node.js/Express backend services, PostgreSQL, REST APIs, Docker, AWS EC2 production deployment with CI/CD.
- Built a rule-based expert system for automated recon → probe → verify pipeline with fail-closed verification gates; deterministic, zero-LLM-cost detection across 8 vulnerability classes.

Web Developer Intern — **Squarecell Resource India Pvt. Ltd.** *Jan 2026 – Feb 2026*
Remote

- Built a coding-practice platform on React.js + Node.js/Express; cut average page load time by 35%.
- Engineered optimized MongoDB data pipelines with efficient state synchronization; reduced data-retrieval latency by 40%.

PROJECTS

Dark Matter — Autonomous Bug-Bounty Platform *2026*
hack.thebhavesh.online | React, Node.js/Express, Go, PostgreSQL, Docker, AWS EC2

- Shipped a full-stack platform that autonomously discovers and verifies web vulnerabilities: React frontend, live scan reporting, persistent finding dossiers.
- **11 verified findings** (4 critical, 5 high, 2 medium) across XSS, SQLi, command injection, CSRF and more on controlled training targets — every finding machine-verified, zero false positives filed.

DocGenie AI — AI Healthcare Documentation Assistant
Google Gemini API, Jest

- Built an AI assistant that drafts clinical documentation from prompts; cut manual review time by 60%; 85% test coverage with Jest.

StudyTop — MERN E-Learning Platform
MongoDB, Express.js, React.js, Node.js, REST APIs — 98% Lighthouse, +25% engagement

TECHNICAL SKILLS

Languages: ★ C, C++, Python, JavaScript (ES6+), Go, SQL
Backend: Node.js, Express.js, Go, REST APIs, PostgreSQL, MongoDB
Frontend: React.js, HTML5, CSS3, responsive UI
Tools & Practices: Git, GitHub, Docker, Linux, CI/CD, System Design, Distributed Systems
Security: Vulnerability research, bug-bounty methodology, defensive security mindset

ACHIEVEMENTS & CERTIFICATIONS

- **350+ LeetCode problems solved** (139 Easy · 188 Medium · 29 Hard).
- **CGPA 9.20/10** — Bikaner Technical University.
- Certifications: ReactJS Foundations (ScholarHat, 2026); Node.js Certification (Scaler, 2026); Full Stack Development — Key Skills for 2026 (GUVI / HCL).
- Languages: Hindi (Native), English (Professional).
